

Sterile intraocular irrigating solution (BSS)

BSS is a physiological irrigating solution for ophthalmological procedures which is isotonic to the eye tissue and contains necessary electrolytes for the cell metabolism.

- Highly purified
- Easy to use
- Storage at room temperature

Sterile irrigating solution	1 ml contains
sodium chloride	6.40 mg
potassium chloride	0.75 mg
calcium chloride 2 H ₂ O	0.48 mg
magnesium chloride 6 H ₂ O	0.30 mg
sodium acetate 3 H ₂ O	3.90 mg
sodium citrate 2 H ₂ O	1.70 mg
Excipients	water for injections (sodium hydroxide or hydrochloric acid up to pH 7,2)

Indications and usage

BSS is indicated for use as an intraocular irrigating solution during intraocular surgical procedures involving perfusion of the eye.

- Cataract extraction
- Cornea transplantation
- Vitrectomy
- Corneal lubrication
